

## OPINIONS FROM OUR CUSTOMERS

New | Millennia | Group

«The AuraPortal team demonstrated how everything can be created through their user interface without the need for any programming.»

«The procedure of managing requests for development is being successfully implemented with AuraPortal. »

«With AuraPortal we have managed to avoid nonconformities and the disruption of the processes, and we now have much greater agility in decision-making.»

«Using AuraPortal has standardized stable processes in the production chain, hereby improving the quality of the service we offer our customers.»

«We selected AuraPortal because of its value for money, no programming feature and versatility to deliver general and specific solutions. »

«AuraPortal is excellent and very flexible. The ability to make immediate changes, test them and implement them is a big plus.»

«We selected AuraPortal BPM because, being one of the most important in the market, popular amongst large multinational companies, it was the only one that allowed us to start the project in a short space of time.»

«GEA-TOYOTA, based on the AuraPortal BPMS, makes it possible to centralize work and maintain the same criteria for all dealers.»

«AuraPortal allows the agile implementation and maintenance of our processes, avoiding expensive tailor-made applications that can be difficult to maintain.»

«AuraPortal ensures the continuous improvement of processes and quickly adapts to governmental changes.»

«Some of the main reasons why we use AuraPortal its speed for building solutions and how easily it integrates with other systems.»

«Its functionality offers great advantages in process implementation and modification, leading to greater operational efficiency.»

«AuraPortal has greatly helped to automate the communication between departments, resulting in considerable time savings in meetings and verbal communications».

«The most important benefits are clearly the reductions in task execution times which used to be very time consuming. Furthermore, we receive analytical information that we didn't have before».

«The most significant innovation has been in response times. Processes which previously took almost a day to execute can now be completed in 15 to 20 minutes».

«We spent a long time looking for the best solution to automate and improve our processes. We found it in AuraPortal and I'm extremely impressed.»
