AuraPortal is the best option for process management and we have not stopped implementing it since the moment we selected it as our solution.

The unification of technological tools, attention channels and simplification of processes has led to a more productive and pleasant work environment.

The AuraPortal team demonstrated how they had created it all through their user interface, without requiring any code.

AuraPortal has empowered us to consolidate our zero-paper policy. Whilst the document remains virtual, it is secure.

We used to have 60% productivity and since the implementation of AuraPortal it has increased to 85%.

Using AuraPortal has standardized table processes in the production chain, hereby improving the quality of the service we offer our customers.

We selected AuraPortal because of its value for money, no programming feature and versatility to deliver general and specific solutions.

Thanks to AuraPortal, we now have a reliable information monitoring system; Strengthening our daily news clipping service, content analysis reports, sector reports...

AuraPortal is a tool that is constantly being innovated, in addition it is technically prepared for the Systems used by our company.
“AuraPortal is excellent and very flexible. The ability to make immediate changes, test them and implement them is a big plus.”

“With AuraPortal we achieve the BPM implementation of processes in only 2 months.”

“Its functionality offers great advantages in process and modification leading to greater operational efficiency.”

“The AuraPortal BPM Suite allows for the processes to be easily and agilely implemented and maintained.”

“AuraPortal ensures the continuous improvement of processes and quickly adapts to governmental changes.”

“Some of the main reasons why we use AuraPortal is its speed for building solutions and how easily it integrates with other systems.”

“GEA-TOYOTA based on the AuraPortal BPMS makes it possible to centralize work and maintain the same criteria for all dealers.”

“We now have reports (measurement indicators) in real time, which has been of great benefit to continuously improve the service we offer our customers.”

“The most important benefits are clearly the reductions in task execution times which used to be very time consuming. Furthermore, we receive analytical information that we didn’t have before.”
«We spent a long time looking for the best solution to automate and improve our processes. We found it in AuraPortal and I'm extremely impressed.»

«Currently, we are in a new stage of process automation for new research protocols, and the pursuit of integration with more of the Institutes’ systems.»

«With AuraPortal we have managed to avoid nonconformities and the disruption of the processes, and we now have much greater agility in decision-making.»
